

### Phin Feature

**Lily Kuonen** Professor of Art and Foundations Coordinator, has mounted a solo exhibition of her work titled **PLAYNTINGS: Chroma Shift** at Fulcrum Gallery. Part of Columbus State University's gallery network, the Fulcrum Gallery established a high visibility exhibition venue as a window-front storefront space to fulfill its mission of community outreach. Exhibitions are visible from outside, making this the perfect gallery for social distancing. Kuonen will also serve as juror for their Annual Art Foundations Exhibition, speak at an annual department convocation, and lecture for the student body (virtually).

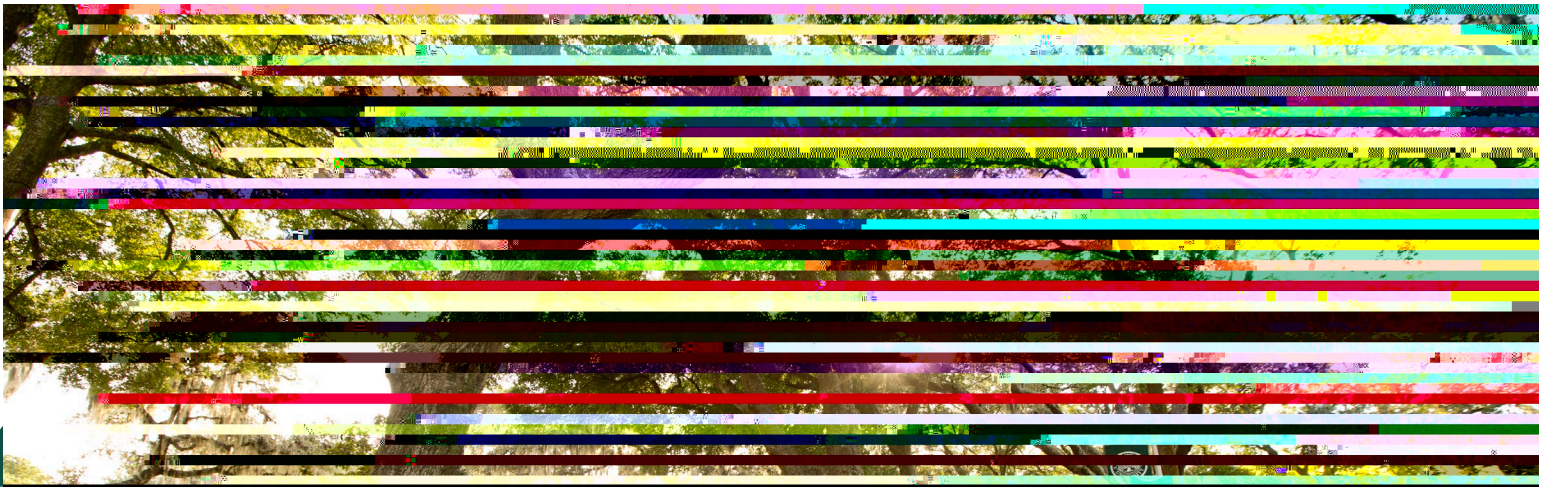

**Dr. Catherine Saenz**, Assistant Professor of Kinesiology presented at the Jax Saludable virtual conference on the

where physicians s  
areasdiscussed important  
health issues and initiatives to advance  
patient-centered healthcare.

## A CCOMPLISHMENTS

The Linda Berry Stein College of Fine Arts has been awarded a \$15,000 grant by the **Cornelia T. Bailey Foundation** 2020 Arts Program for collaborative community work with the LaVilla School of the Arts in Jacksonville. Stein College students and faculty will partner with the LaVilla community in a year-long program of artistic/classroom exchange and guest artist residencies during the 2020-2021 academic year. The mission of the Cornelia T. Bailey Foundation is to promote the arts, education and initiatives that seek to better our world utilizing nature and the sciences.

**Dr. Nisse Goldberg**, Professor of Biology and Marine Science had her co-authored article "Patterns in submerged aquatic vegetation in the lower St. Johns River, Florida, from 2001 to 2019" published in the Journal of Aquatic Plant Management.

**Dr. Julius Demps**, Professor of Management, contributed an invited column "My View: Should Winn-Dixie change its name?" to the Jacksonville Daily Record. You can view the article online at [jaxdailyrecord.com](http://jaxdailyrecord.com).

**Dr. Kara Conway**, Assistant Professor of Biology, had her co-authored article “Distinct Tissue-Specific Roles for the Disease-Associated Autophagy Genes ATG16L2 and ATG16L1” published in The Journal of Immunology, 203: 1820-1829.

**Dr. Heather Hausenblas**, Professor of Kinesiology,  
**Dr. Kara Conway**, Assistant Professor of Biology,  
**Dr. Charles Harvey**, Clinical Assistant Professor o
